STAFF SOFTWARE DEVELOPMENT ENGINEER IN TEST (SDET) | PLAYWRIGHT |
TYPESCRIPT | PYTHON | AI QUALITY ENGINEERING

Senior QA Automation Engineer specializing in Playwright, TypeScript, Python, API Automation, CI/CD, Cloud Testing, LLM Evaluation, AI-Assisted Testing, Healthcare Technology, and Enterprise Quality Engineering.

CORE COMPETENCIES

Playwright • TypeScript • Python • Java • JavaScript • SQL • Selenium • Cypress • Appium • REST Assured • Postman • SoapUI • API Testing • UI Automation • End-to-End Testing • Contract Testing • Database Validation • Performance Testing • CI/CD • GitHub Actions • Jenkins • Docker • AWS • Linux • Snowflake • PostgreSQL • MySQL • Agile • Scrum • BDD • ATDD • Healthcare Systems • AI Testing • LLM Evaluation • DeepEval • RAGAS • LangChain • MCP (Model Context Protocol) • OpenAI APIs • Prompt Engineering • Agentic Workflows

PROFESSIONAL SUMMARY

Hands-on Staff Software Development Engineer in Test (SDET) with 10+ years of experience building enterprise automation frameworks, CI/CD validation pipelines, API testing solutions, cloud quality systems, and AI-assisted testing platforms.

Deep expertise in Playwright, TypeScript, Python, REST APIs, SQL, AWS, Docker, GitHub Actions, and scalable automation architectures supporting healthcare, aviation, insurance, finance, automotive, and education technology organizations.

Practical experience implementing LLM evaluation frameworks using DeepEval, RAGAS, LangChain, MCP integrations, prompt engineering methodologies, and OpenAI APIs. Strong focus on automation-first quality strategies, shift-left testing, developer enablement, and continuous delivery practices.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, Java, JavaScript, SQL

Automation Frameworks: Playwright, Selenium WebDriver, Cypress, Appium, REST Assured, Postman, SoapUI

AI & LLM Engineering: DeepEval, RAGAS, LangChain, MCP, OpenAI APIs, Prompt Engineering, Agentic Workflows

DevOps & Cloud: AWS, Docker, Jenkins, GitHub Actions, CI/CD Pipelines, Linux

Databases: PostgreSQL, MySQL, SQL Server, Snowflake

PROFESSIONAL EXPERIENCE

DocNow.ai | Staff SDET & AI Quality Engineer | 2025–Present

- Develop Playwright and TypeScript automation frameworks for enterprise healthcare applications.
- Build reusable browser automation, API validation, and database testing libraries using Python.
- Implement CI/CD quality gates through GitHub Actions and automated release validation workflows.
- Design LLM evaluation pipelines using DeepEval, RAGAS, prompt engineering techniques, and OpenAI APIs.
- Develop MCP-based automation solutions integrating AI-assisted testing into software delivery processes.

Stride Inc. | Principal SDET | 2023–2025

- Built Playwright and TypeScript automation frameworks integrated with GitHub Actions and enterprise CI/CD pipelines.
- Developed automated API testing solutions using REST Assured and Postman.
- Performed Snowflake validation through SQL-driven automated verification approaches.

Bravado Health | Lead QA Automation Engineer | 2021–2023

- Designed healthcare automation frameworks using Selenium, Cypress, Java, REST Assured, and SOAP technologies.
- Built AWS-based quality validation pipelines supporting cloud-native healthcare systems.

Mindtree Ltd. | Senior QA Consultant | 2017–2021

Client engagements: Southwest Airlines, Delta Air Lines, Toyota Connected, Equifax, Tower Hill Insurance.

- Built enterprise automation frameworks using Playwright, Selenium, Java, Python, TypeScript, REST APIs, and Appium.
- Implemented CI/CD validation pipelines using Jenkins and Git-based development workflows.

EDUCATION

Northeastern University — Master of Science, Information Technology Project Management

PROFESSIONAL CERTIFICATIONS

Harvard University — Data Science for Business

University of Alberta — Software Product Management

HEC Paris — Leadership Specialization
